ABOUT ME

I am a motivated and detail-oriented Bachelor of Computer Applications (BCA) graduate with a strong foundation in software development, database management, and IT systems. My academic background is complemented by hands-on experience in coding, troubleshooting, and project management, allowing me to tackle complex technical challenges effectively. I am passionate about leveraging my skills to develop innovative solutions and am eager to contribute to a dynamic tech team. My strong analytical abilities, coupled with excellent communication and teamwork skills, make me a valuable asset to any organization.

ACHIEVEMENTS

PROJECTS

Online Driver hiring App

An online driver hiring app is a mobile application that connects vehicle owners with professional drivers for temporary or permanent driving needs. Users can post job requests with details like location, time, and payment, while drivers can browse and accept suitable jobs. The app includes features such as user registration, driver profiles, job listings, and a rating system to ensure reliability and transparency.

Quiz competition website

A quiz competition website built using PHP and HTML provides a simple platform for users to participate in online quizzes. It allows users to register, answer multiple-choice questions, and receive immediate feedback on their performance. This micro project is suitable for BCA students to practice web development skills and understand basic database interactions.

INTERNSHIP

Internships play a vital role in technical education by providing students with opportunities to apply theoretical knowledge in real-world environments. As part of the first-year MCA curriculum, a one-month internship was successfully completed at Zoople Technology Pvt. Ltd., Vennala from April, 2025. The internship focused on Backend Development using React.js, a widely adopted technology in modern web development. integration.
